Why “Colours of the Earth?”

Facts:

- 1 in 20 Australian children are diagnosed with ADHD/Hyperkinetic
- Audio Processing deficit is the new buzz diagnosis
- Dementia is the **second leading cause of death** of Australians.
- In 2020, it is estimated that almost 1.6 million people in Australia are involved in the care of someone living with dementia
- Improves listening skills in all ages
- Improves focus
- Improves concentration
- Improves “I can hear you but I don’t know what you are saying”

Possible Causes of declining auditory skills :

- **Living in a visual, IT dominated world**
- Less family connection
- Fast paced lifestyles
- Stress, Anxiety
- Lack of mental stimulation

Exercise your mind for aging

- Keeping the mind active is likely to reduce the risk of dementia. Regularly challenging mentally seems to build up the brain’s ability to cope with disease. One way to think about it is ‘Use it or lose it’.
- Find something that challenges the brain and do it
 - puzzles, crosswords or quizzes
 - **play card games or board games**
